### **1** Identification

- · Product identifier
  - · Product number Pl810
  - Trade name: SB UV SEALER WHITE
    - $\cdot$  Application of the substance / the mixture For professional use

### · Details of the supplier of the safety data sheet

- Manufacturer/Supplier: IVM Chemicals Srl
   Viale della Stazione 3 -27020 Parona (PV)Italy -Tel +39 038425441
- Information department: Environmental Health and safety office hseoffice @ivmchemicals.com
- Emergency telephone number: ChemTel Expert Assistance Hotline/SDS Fax Access by dialing 1-800-255-3924 or for International +1-813-248-0585.

### 2 Hazard(s) identification

· Classification of the substance or mixture		
Flammable Liquids 2	H225	Highly flammable liquid and vapor.
Skin Irrititation 2	H315	Causes skin irritation.
Eye Irritation 2A	H319	Causes serious eye irritation.
Sensitization - Skin 1	H317	May cause an allergic skin reaction.
Carcinogenicity 1B	H350	May cause cancer.
Toxic to Reproduction 2	H361	Suspected of damaging fertility or the unborn child.
Specific Target Organ Toxicity - Repeated Exposure 1	H372-H37	73 Causes damage to the hearing organs through prolonged or repeated exposure. Route of exposure: Inhalation. May cause damage to the central nervous system and the hearing organs through prolonged or repeated exposure. Route of exposure: Oral.
Aquatic Acute 3	H402	Harmful to aquatic life.
Aquatic Chronic 3	H412	Harmful to aquatic life with long lasting effects.

#### · Label elements

#### · GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

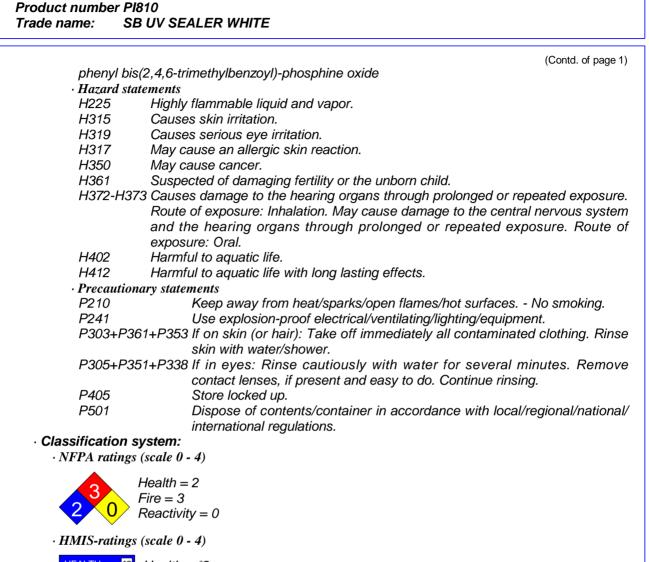

· Signal word Danger

• Hazard-determining components of labeling: styrene PHENYL ETHYL PHOSPHATE toluene maleic anhydride iVM Chemicals

# 4 First-aid measures

### · Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

personal protective equipment for first aid responders is recommended. (please see section 8) · *After inhalation:* 

Supply fresh air and to be sure call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

• After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Take off immediately all contaminated clothing, include underwear and shoes (if necessary). Rinse thoroughly with plenty of water for at least 20 minutes and take medical advise. If medical advise is needed have products container or label at hand.

• After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist , consult a doctor.

#### Product number PI810 Trade name: SB UV SEALER WHITE

· After swallowing: Do not induce vomiting; immediately call for medical help.

(Contd. of page 3)

- · Information for doctor:
  - · Most important symptoms and effects, both acute and delayed Allergic reactions
  - For symptoms and effects caused by substances, refer to Section 11.
  - · Indication of any immediate medical attention and special treatment needed No further relevant information available.

### 5 Fire-fighting measures

- · Extinguishing media
  - · Suitable extinguishing agents: Alcohol resistant foam
  - Alcohol resistant foam, CO, powder, water spray/mist.
  - · For safety reasons unsuitable extinguishing agents:
  - Do not use a jet water stream as it may scatter and spread fire.

#### · Special hazards arising from the substance or mixture

- During heating or in case of fire poisonous gases are produced. In case of fire, the following can be released: Nitrogen oxides (NOx)
- Carbon monoxide (CO)

### Advice for firefighters

100-42-5 styrene

Cool by spraying with water the containers to prevent product decomposition and the development of substances potentially hazardous for health and also, in the case of closed containers exposed to flames to prevent explosions.

· Protective equipment:

Hardhat with visor, fireproof clothing, suitable gloves and if necessary respiratory protective device.

## 6 Accidental release measures

<ul> <li>Personal precautions, protective equipment and emergency procedures         Mount respiratory protective device.         Wear protective equipment. Keep unprotected persons away.         Ensure adequate ventilation         Keep away from ignition sources         Environmental precautions:         Do not allow product to reach sewage system or any water course.         Inform respective authorities in case of seepage into water course or sewage system.         Do not allow to enter sewers/ surface or ground water.         Methods and material for containment and cleaning up:         Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawa         Dispose contaminated material as waste according to Section 13.         Ensure adequate ventilation.         Reference to other sections         See Section 7 for information on safe handling.         See Section 13 for disposal information.         Protective Action Criteria for Chemicals     </li> </ul>	dust).

# 7 Handling and storage

### · Handling:

· Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace.

- Open and handle receptacle with care.
- Prevent formation of aerosols.
- Protect against electrostatic charges.
- Keep respiratory protective device available.

Use explosion-proof apparatus / fittings and spark-proof tools.

• Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect against electrostatic charges.

Keep respiratory protective device available.

### · Conditions for safe storage, including any incompatibilities

### · Storage:

• Requirements to be met by storerooms and receptacles:

Store in a cool, well-ventilated area, away from heat and sources of ignition

- Provide solvent resistant, sealed floor.
- Observe the label precautions, the expiration date for the use, if not indicated, is from delivery date of goods.

In cases where there is no reported expiration date , it means that the product must be used within 8 months.

- · Information about storage in one common storage facility: Not required.
- $\cdot$  Further information about storage conditions:
- Keep receptacle tightly sealed.

(Contd. on page 6)

(Contd. of page 5)

Wash hands before breaks and at the end of work.

(Contd. of page 7)

Store protective clothing separately. Avoid contact with the eyes and skin. Pregnant women should strictly avoid inhalation or skin contact. · Breathing equipment: Short term filter device: Filter AX Suitable respiratory protective device recommended. · Protection of hands: Protective gloves Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation The glove material has to be impermeable and resistant to the product . · Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. · Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles

#### 9 Physical and chemical properties · Information on basic physical and chemical properties · General Information · Appearance: · Form: Fluid · Color: According to product specification · Odor: Characteristic Not determined. · Odor threshold: · pH-value: Mixture is non-polar/aprotic. · Change in condition Undetermined. • Melting point/Melting range: 56 °C (132.8 °F) · Boiling point/Boiling range: -17 °C (1.4 °F) · Flash point: · Flammability (solid, gaseous): Not applicable. # 10 Stability and reactivity

- · Reactivity typical of the product as indicated in the data sheet
- **Chemical stability** The product is stable in normal conditions of storage and use recommended • Thermal decomposition / conditions to be avoided:
- No decomposition if used and stored according to specifications.
- · Possibility of hazardous reactions Vapours may form explosive mixtures with air
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: Acids, alkalis and oxidizing agents
- · Hazardous decomposition products:

in case of possible formation of combustion:

# **13 Disposal considerations**

· Waste treatment methods

· Recommendation:

Printing date 08/15/2022

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Hand over to hazardous waste disposers.

Dispose of contents and container in accordance with local state and federal regulations.

· Uncleaned packagings:

· Recommendation: Disposal must be made according to official regulations.

· National regulations:

The product is subject to be labeled according with the prevailing version of the regulations on hazardous substances.

· Information about limitation of use:

Workers are not allowed to be exposed to the hazardous carcinogenic materials contained in this preparation. Exceptions can be made by the authorities in certain cases.

· Chemical safety assessment: A Chemical Safety Assessment has not been carried out.
