### **1** Identification

- · Product identifier
  - · Product number TA44
  - Trade name: CLEAR PU SEALER HIGH TRANSP.
    - $\cdot$  Application of the substance / the mixture For professional use

### · Details of the supplier of the safety data sheet

- *Manufacturer/Supplier:* IVM Chemicals Srl Viale della Stazione 3 -27020 Parona (PV)Italy -Tel +39 038425441
- Information department: Environmental Health and safety office hseoffice @ivmchemicals.com
- Emergency telephone number: ChemTel Expert Assistance Hotline/SDS Fax Access by dialing 1-800-255-3924 or for International +1-813-248-0585.

## 2 Hazard(s) identification

· Classification of the substance or mixture	
Flammable Liquids 2	H225 Highly flammable liquid and vapor.
Skin Irrititation 2	H315 Causes skin irritation.
Eye Irritation 2A	H319 Causes serious eye irritation.
Carcinogenicity 2	H351 Suspected of causing cancer.
Toxic to Reproduction 2	H361 Suspected of damaging fertility or the unborn child.
Specific Target Organ Toxicity - Single Exposure	3H335 May cause respiratory irritation.
Specific Target Organ Toxicity - Repeated Exposure 2	H373 May cause damage to the central nervous system and the hearing organs through prolonged or repeated exposure. Route of exposure: Oral and Inhalation.
Aspiration Hazard 1	H304 May be fatal if swallowed and enters airways.
Aquatic Acute 3	H402 Harmful to aquatic life.
Aquatic Chronic 3	H412 Harmful to aquatic life with long lasting effects.

#### · Label elements

- · GHS label elements
- The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

- · Signal word Danger
- Hazard-determining components of labeling: xylene ethylbenzene toluene Solvent naphtha (petroleum), light arom.

## 4 First-aid measures

· Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

personal protective equipment for first aid responders is recommended. (please see section 8) · After inhalation:

In case of unconsciousness place patient stably in side position for transportation.

· After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Take off immediately all contaminated clothing, include underwear and shoes (if necessary). Rinse thoroughly with plenty of water for at least 20 minutes and take medical advise. If medical advise is needed have products container or label at hand.

US

• After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist , consult a doctor.

- · After swallowing: Do not induce vomiting; immediately call for medical help.
- · Information for doctor:

• Most important symptoms and effects, both acute and delayed

For symptoms and effects caused by substances, refer to Section 11.

• Indication of any immediate medical attention and special treatment needed

No further relevant information available.

## 5 Fire-fighting measures

#### · Extinguishing media

#### • Suitable extinguishing agents: Alcohol resistant foam

- Alcohol resistant form CO powder
- Alcohol resistant foam, CO, powder, water spray/mist.

 $\cdot$  For safety reasons unsuitable extinguishing agents:

Do not use a jet water stream as it may scatter and spread fire.

• **Special hazards arising from the substance or mixture** During heating or in case of fire poisonous gases are produced.

In case of fire, the following can be released: Nitrogen oxides (NOx)

Carbon monoxide (CÓ)

Advice for firefighters

Cool by spraying with water the containers to prevent product decomposition and the development of substances potentially hazardous for health and also, in the case of closed containers exposed to flames to prevent explosions.

· Protective equipment:

Hardhat with visor, fireproof clothing, suitable gloves and if necessary respiratory protective device.

### 6 Accidental release measures

<ul> <li>Personal precautions, protective equipment and emergency procedures Mount respiratory protective device.</li> <li>Wear protective equipment. Keep unprotected persons away.</li> <li>Ensure adequate ventilation Keep away from ignition sources</li> <li>Environmental precautions: Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system.</li> </ul>
Do not allow to enter sewers/ surface or ground water.
Methods and material for containment and cleaning up:
Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
Dispose contaminated material as waste according to Section 13.
Ensure adequate ventilation.
· Reference to other sections
See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for disposal information.
· Protective Action Criteria for Chemicals
· PAC-1:

## 7 Handling and storage

#### · Handling:

· Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Prevent formation of aerosols. Protect against electrostatic charges. Keep respiratory protective device available. Use explosion-proof apparatus / fittings and spark-proof tools. · Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect against electrostatic charges. Keep respiratory protective device available. Conditions for safe storage, including any incompatibilities · Storage: • Requirements to be met by storerooms and receptacles: Store in a cool, well-ventilated area, away from heat and sources of ignition Provide solvent resistant, sealed floor. Observe the label precautions, the expiration date for the use, if not indicated, is from delivery date of goods. In cases where there is no reported expiration date, it means that the product must be used within 8 months.

· Information about storage in one common storage facility: Not required.

• Further information about storage conditions: Keep receptacle tightly sealed.

Store in cool, dry conditions in well sealed receptacles.

• Specific end use(s) Those typical of the product and the instructions in the data sheet if required.

## 8 Exposure controls/personal protection

· Additional information about design of technical systems: No further data; see item 7.

· Protection of hands:

Protective gloves

Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

The glove material has to be impermeable and resistant to the product .

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

#### · Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles

Information on basic physical and	chemical properties
· General Information	
· Appearance:	
· Form:	Fluid
· Color:	According to product specification
· Odor:	Strong
• Odor threshold:	Not determined.
· pH-value:	Mixture is non-polar/aprotic.
· Change in condition	
<ul> <li>Melting point/Melting range:</li> </ul>	Undetermined.
· Boiling point/Boiling range:	77 °C (170.6 °F)
· Flash point:	-4 °C (24.8 °F)
· Flammability (solid, gaseous):	Not applicable.
· Ignition temperature:	315 °C (599 °F)
· Decomposition temperature:	Not determined.
· Auto igniting:	Product is not selfigniting.
· Danger of explosion:	Product is not explosive. However, formation of explosive
	air/vapor mixtures are possible.
· Explosion limits:	
· Lower:	1 Vol %
· Upper:	30 Vol %
· Vapor pressure at 20 °C (68 °F):	105 hPa (78.8 mm Hg)

## 10 Stability and reactivity

- · Reactivity typical of the product as indicated in the data sheet
- **Chemical stability** The product is stable in normal conditions of storage and use recommended • Thermal decomposition / conditions to be avoided:
  - No decomposition if used according to specifications.
- Possibility of hazardous reactions
- Reacts with oxidizing agents. Vapours may form explosive mixtures with air
- Conditions to avoid No further relevant information available.
- Incompatible materials: Acids, alkalis and oxidizing agents
- · Hazardous decomposition products:

*in case of possible formation of combustion: Carbon monoxide and carbon dioxide*

### Human carcinogenicity data

Two studies of workers potentially exposed to ethylbenzene in a production plant and a styrene polymerization plant were available. In the first study, no excess of cancer incidence was found but the description of methods was insufficient to allow proper evaluation of this finding. In the second study, no cancer mortality excess was observed during the follow-up of 15 years.

#### Evaluation

There is inadequate evidence in humans for the carcinogenicity of ethylbenzene. There is sufficient evidence in experimental animals for the carcinogenicity of ethylbenzene.
