### **1** Identification

- · Product identifier
  - Product number TF40
  - Trade name: CLEAR PU INSULATOR
    - · Application of the substance / the mixture For professional use
- · Details of the supplier of the safety data sheet
  - Manufacturer/Supplier: IVM Chemicals Srl
     Viale della Stazione 3 -27020 Parona (PV)Italy -Tel +39 038425441
  - Information department: Environmental Health and safety office hseoffice @ivmchemicals.com
  - Emergency telephone number: ChemTel Expert Assistance Hotline/SDS Fax Access by dialing 1-800-255-3924 or for International +1-813-248-0585.

### 2 Hazard(s) identification

 Classification of the substance or mixture Flammable Liquids 2 Skin Irrititation 2 Eye Irritation 2A Toxic to Reproduction 2

H225 Highly flammable liquid and vapor.
H315 Causes skin irritation.
H319 Causes serious eye irritation.
H361 Suspected of damaging fertility or the unborn child.

Specific Target Organ Toxicity - Single Exposure 3H336 May cause drowsiness or dizziness.

Specific Target Organ Toxicity - Repeated Exposure 2

H373 May cause damage to the central nervous system and the hearing organs through prolonged or repeated exposure. Route of exposure: Oral and Inhalation.

### · Label elements

· GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

· Signal word Danger

Hazard-determining components of labeling: toluene isobutyl acetate ethyl acetate butanone
Hazard statements H225 Highly flammable liquid and vapor. H315 Causes skin irritation.

H319 Causes serious eye irritation.

H361 Suspected of damaging fertility or the unborn child.

H336 May cause drowsiness or dizziness.

H373 May cause damage to the central nervous system and the hearing organs through prolonged or repeated exposure. Route of exposure: Oral and Inhalation.

### 4 First-aid measures

#### · Description of first aid measures

- · General information:
  - Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

- personal protective equipment for first aid responders is recommended. (please see section 8) · *After inhalation:*
- In case of unconsciousness place patient stably in side position for transportation.
- · After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Take off immediately all contaminated clothing, include underwear and shoes (if necessary). Rinse thoroughly with plenty of water for at least 20 minutes and take medical advise. If medical advise is needed have products container or label at hand.

#### · After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist , consult a doctor.

• After swallowing: Do not induce vomiting; immediately call for medical help.

#### · Information for doctor:

· Most important symptoms and effects, both acute and delayed

- For symptoms and effects caused by substances, refer to Section 11.
- Indication of any immediate medical attention and special treatment needed No further relevant information available.

### 5 Fire-fighting measures

### · Extinguishing media

- Suitable extinguishing agents:
- Alcohol resistant foam

Alcohol resistant foam, CO, powder, water spray/mist.

- · For safety reasons unsuitable extinguishing agents:
- Do not use a jet water stream as it may scatter and spread fire.

### Special hazards arising from the substance or mixture

During heating or in case of fire poisonous gases are produced. In case of fire, the following can be released: Nitrogen oxides (NOx)

Carbon monoxide (CO)

### · Advice for firefighters

Cool by spraying with water the containers to prevent product decomposition and the development of substances potentially hazardous for health and also, in the case of closed containers exposed to flames to prevent explosions.

· Protective equipment:

Hardhat with visor, fireproof clothing, suitable gloves and if necessary respiratory protective device.

### 6 Accidental release measures

 Personal precautions, protective equipment and emergency procedures Mount respiratory protective device.
 Wear protective equipment. Keep unprotected persons away.
 Ensure adequate ventilation
 Keep away from ignition sources

### 7 Handling and storage

### · Handling:

· Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Prevent formation of aerosols. Protect against electrostatic charges. Keep respiratory protective device available. Use explosion-proof apparatus / fittings and spark-proof tools. · Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect against electrostatic charges. Keep respiratory protective device available. · Conditions for safe storage, including any incompatibilities · Storage: • Requirements to be met by storerooms and receptacles: Store in a cool, well-ventilated area, away from heat and sources of ignition Provide solvent resistant, sealed floor. Observe the label precautions, the expiration date for the use, if not indicated, is from delivery date of goods. In cases where there is no reported expiration date, it means that the product must be used within 8 months.

· Information about storage in one common storage facility: Not required.

Tightly sealed goggles

Information on basic physical and o	chemical properties
· General Information	
· Appearance: · Form:	Fluid
· Form: · Color:	According to product specification
· Color: · Odor:	Characteristic
• Odor threshold:	Not determined.
· pH-value:	Mixture is non-polar/aprotic.
· Change in condition	
• Melting point/Melting range:	Undetermined.
· Boiling point/Boiling range:	77 °C (170.6 °F)
· Flash point:	-4 °C (24.8 °F)
· Flammability (solid, gaseous):	Not applicable.
· Ignition temperature:	405 °C (761 °F)
· Decomposition temperature:	Not determined.
· Auto igniting:	Product is not selfigniting.
· Danger of explosion:	Product is not explosive. However, formation of explo air/vapor mixtures are possible.
· Explosion limits:	
· Lower:	1.2 Vol %
· Upper:	11.5 Vol %
· Vapor pressure at 20 °C (68 °F):	105 hPa (78.8 mm Hg)
• Density (+/- 0,03) at 20 °C (68 °F):	0.919 g/cm³ (7.669 lbs/gal)
· Relative density	Not determined.

### 10 Stability and reactivity

· Reactivity typical of the product as indicated in the data sheet

- **Chemical stability** The product is stable in normal conditions of storage and use recommended • Thermal decomposition / conditions to be avoided:
  - No decomposition if used and stored according to specifications.
- · Possibility of hazardous reactions Vapours may form explosive mixtures with air
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: Acids, alkalis and oxidizing agents

Hazardous decomposition products:

*in case of possible formation of combustion: Carbon monoxide and carbon dioxide*
